Re: Feeding animals to animals

To Whom It May Concern:

I am writing to tell you how disgusted I am that the FDA has not already banned the practice of feeding animals to animals. Now I see that this practice may not only cause "mad cow disease" but also a degenerative brain disorder called CJD.

Although there is no proven link to CJD, you just have to think that since cows do not regularly hunt down other animals to eat, that there is a problem with feeding them animal protein. I understand that while feeding cows to cows is possibly banned now, farmers are still feeding cows to pigs, then pigs to cows, and the problem hasn't stopped.

The whole thing just makes me sick. No big surprise that to go against what God or Nature intended—for cows and other vegetarian animals to eat grass and grains—is going to make us all diseased.

Sincerely,

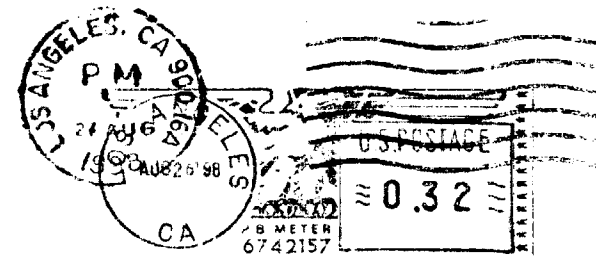

Rebekah Paul
